POWER PLAY

MOBILE GAMING GRIP + 2000mAh BATTERY

SIG-8206 (silver)

At SIGNAL, we love all games equally - including touchscreen games. So we created Power Play to maximize the touchscreen gaming experience. In the past, touchscreen games suffered from cramped fingers and sweaty palms. The few grips that have been attempted are typically cheap plastic, not ergonomic, and with limited device compatibility. Power Play addresses these challenges with authority and adds a 2000mAh built-in battery.

Toss the Power Play in your backpack or briefcase - it's the perfect way to make your next commute or transcon flight pass faster. When not in use, the clip automatically retracts.

UNIVERSAL GAME GRIP

DEDICATED MOBILE GAMING GRIP

SIG-8204 (silver), SIG-8205 (black)

The Universal Game Grip takes the same great principles from the Power Play and simplifies it down to the core - a great touchscreen gaming accessory.

INCONCERT PRO

CONCERT QUALITY SOUND

SIG-8153 (black)

The InConcert Pro table-top speaker system delivers concert quality sound right into your home. Stream music wirelessly or with a standard audio cable. Even connect to your TV and enhance the way you hear your favorite sound. If your home theater system doesn't have Bluetooth we've got you covered. InConcert Pro has an audio out port to convert your home theater into a wireless home theater.

EDGE⁺

UNIVERSAL STAND + 4000mAh BATTERY

SIG-8203 (black)

We feel that a portable power pack needs to deliver as much utility as possible. So we designed Edge+ to do more than just charge your device. Unlike the typical "power brick", Edge+ provides the perfect stand for your device - so you can work or play with stability.

Edge+ adds a 4000mAh lithium battery to the Edge - that's enough power to fully recharge the typical smartphone twice, or play over 100 hours of audio.

UNIVERSAL POWER VIEW STAND

UNIVERSAL STAND + 10000mAh BATTERY

SIG-8209 (black)

Edge+ with 4000mAh not enough power? We've got you covered. The Universal Power View increases the battery capacity to 10000mAh. Business travelers, vacationers and power users alike - this is the ultimate travel mate for power and utility.

EDGE TAKE A STAND

SIG-8202 (black)

Mobile gaming. Media viewing. Video chatting. The Edge Universal Device Stand makes it easy to set your tablet or phone at the ideal viewing angle so you can keep your hands free to work or play. Edge turns virtually any smartphone or tablet into a display. With a wide base for stability, yet a super thin profile for pocket-ability - Edge is easy to carry and use anywhere.

POWER 5

FULL THROTTLE CHARGING + CABLE MANAGEMENT

SIG-8060 (black)

Built on the same great principles as Power Station 5, Power 5 is a universal full charge solution for up to five USB powered devices, including smartphones and tablets. Designed to charge up to five devices at full speed. Cable management and AC power are built right into the base. No clutter, no mess.

Power 5 includes a Qualcomm Quick Charge 2.0 USB port which can cut charging time by as much as 75% for supported devices. It delivers up to 2.4 Amps at the other four universal USB ports. This means it provides full power to every port. No "trickle charge" here.

POWER STATION 5

FULL THROTTLE CHARGING

SIG-8051 (black and silver)

Power Station 5 is a universal full charge solution for up to five USB powered devices, including smartphones and tablets. Designed to charge up to five devices at full speed - so there are no more AC bottlenecks on the kitchen counter or in the IT department. Power Station 5 delivers up to 2.4 Amps at every USB port. This means it provides full power to every port. No "trickle charge" here. Works with any USB powered device or compatible cable - including iOS (30-pin, Lightning), Android, and others. Five cable ties are included for cable management.

OnGo[®] 8000MAH

PREMIUM PORTABLE POWER

SIG-8022 (silver)

OnGo 8000mAh - Business class portable power delivers AC independence for days. Enough power to provide up to 4x full charges for most smartphones. Features 4 USB ports, including 2.4 Amp power, to charge multiple devices at once. The OnGo 8000mAh is the perfect solution for digital nomads and vacationers alike.

ONGo[®] 16000MAH

PREMIUM PORTABLE POWER

SIG-8023 (silver)

OnGo 16000mAh - Expedition-grade power for road warriors and off grid adventurers. Enough power to fully recharge the largest tablets and keep the typical smartphone running for a week or more. The OnGo 16000 is a portable power plant for international missions and extended trips. Three USB ports with 2.4 Amp power to recharge smartphones and tablets, as well as many cameras, GPS units and other USB chargeable devices. The OnGo 16000 will change the balance of power - wherever you go.

POWER STATION 4

TABLETOP POWER FOR FOUR

SIG-8061 (black)

Power Station 4 is a universal full charge solution for up to four USB powered devices, including smartphones, tablets and other USB powered devices. Two high power (2.4 Amp and 2.1 Amp) and two 1 Amp Power Guard™ USB ports charge four devices simultaneously. The stylish black lacquer finish is a perfect accent for any environment.

POWER PERCH

HEADPHONE CHARGE AND DISPLAY STAND

SIG-8127 (silver)

Accommodates most headphone types and sizes. Premium anodized aluminum body. Cable management built in to the base reduces cable clutter. Relieves tension on headband and ear cups. Sleek, minimal design. Power indicator LED. USB port to charge wireless headphones. Rubberized base for stability.

POWER STATION 3.3

FULL POWER FOR 6 DEVICES

SIG-8054 (black)

Power Station 3.3 charges and powers six devices simultaneously without compromise. Three USB and three AC ports charge at maximum speed, even when fully loaded. Use with laptops, tablets, smartphones and anything else you throw at it. Premium high-gloss face paired with soft rubberized sides make the Power Station 3.3 beautiful in any environment.

CHARGE SMARTER

SIGNAL™ products are made with Power Guard™ USB Ports which combine safety and intelligence to protect your devices while charging. All ports are completely independent and individually react to each device's power requirements, to be certain they get the maximum power needed and not more. Power Guard™ USB Ports will shut the unit off when power overloads or overheating is detected - protecting your devices and the unit from damage.
