USING THE RACING WHEEL

There are 2 possible racing configurations when using the Racing Wheel.

1) Desktop Gameplay

This image shows the Racing Wheel being played on a desktop or table.

2) In-Air Gameplay

This image shows the Racing Wheel being played in mid-air.

Wheel Settings

Depending on the game you are playing, you may want to adjust the Racing Wheel's settings. The Racing Wheel can be locked for LEFT to RIGHT control only. The Racing Wheel can also be set to allow MUTLI-DIRECTIONAL control.

To lock and un-lock the Racing Wheel's directional setting, slide the control locking mechanism UP for COMPLETE control and DOWN for LEFT to RIGHT control only.
